

City of Coburg Water System

Water Rates Study 2012

The City of Coburg has solicited proposals for a Water Rates Study (July 2012). This is designed to update the 2006 Study. The focus of the study is to ensure the City's water and reclaimed wastewater (irrigation water) facilities have sufficient, defensible funding to meet the current and future needs of the system. City Council will consider the recommendations from the Study and may amend Water System policies as a result.

Public Involvement

If you are interested in this process, please note City Council agendas and/or website updates. City Council materials are available at City Hall and at www.coburgoregon.org.

The target completion date for the Water Rates Study is January 2013

The City of Coburg owns and operates a water system which supplies about 3,500 residents and employees through 500 connections. Contact Bob Butler, Public Works Director with general questions about your water service at 541-682-7857.
